

THE LEADER

Ralphs-Pugh has an offer you can't refuse!

The most innovative roller ever built is now available at the same price you're currently paying for replacement rollers.

Urethane Hexagonal Shaft Adapter Roller

Bearing: ABEC-1 precision
Housing: Conductive plastic labyrinth seal
Diameter: 1.9" x .065" wall, galvanized
Shaft: 7/16" hex urethane adapter over
a 5/16" hex internal steel shaft
dual spring loaded

Unique Advantages of Urethane Hexagonal Shaft Adapter Rollers:

- Reduce/eliminate frame wear
—no steel to steel contact
- Reduce/eliminate noise
—no steel to steel contact
- Adapter is part of the roller
—no clumsy frame inserts

Ralphs-Pugh Offer:

We will match your current supplier's price with our Urethane Hexagonal Shaft Adapter rollers for one length only up to a quantity of 200 rollers per location—regardless of current bearing style. Offer is limited to conveyors with a 50 pound per roller load capacity. Available in 1.9" diameter x .065" wall thickness with 7/16" hex shafts only.

You Can't Lose!

Purchasing agent—You pay no more than you're currently paying for replacements and receive an upgraded roller
Maintenance personnel—Precision bearings, no more frame wear, no special frame inserts, easy installation
Managers—Reduced noise, extended equipment life, lower annual production costs, improved employee moral
